

AIRCRAFT INFLATION DIGITAL

PCL has combined the ruggedness of a metal analog inflator with the technology and additional features of a digital gauge to bring forth a new tire inflator and pressure gauge, specifically designed for the aviation industry. The ACCURA® 6 and ACCURA® 64 are lightweight, accurate, safe, and versatile. Both are virtually indestructible, with a polycarbonate screen, large backlit LCD and selectable units of pressure reading, making these the most versatile aviation products PCL has ever launched.

ACCURA® 6 TIRE INFLATOR

SPECIFICATIONS

Compliance:	BS EN12645:2014
Reading Accuracy:	0.1 psi
Max. Supply Pressure:	400 psi
Inflation Flow:	18 cfm
Inflation Range:	2-350 psi
Operating temperature:	5°F to 131°F

KEY BENEFITS

Long, accurate life expectancy
Fast inflation/deflation rates - reduce operating costs
IP54 rated - suited for indoor/outdoor environments
Safety relief valve - prevents over inflation

PART # DESCRIPTION

DAC601	ACCURA6 AVIATION TIRE INFLATOR
---------------	--------------------------------

SPECIFICATIONS

Operating temperature:	5F to 131F
Pressure reading:	up to 350 psi
Accuracy reading:	+/- 2 psi up to 350 psi

KEY BENEFITS

Long, accurate life expectancy
Fast to use and handle
IP54 rated - suited for indoor/outdoor environments
Auto-off after 25 seconds of no-use
Supplied with 2 inline hold-on tire connectors
Registered design

PART # DESCRIPTION

DAC6401	ACCURA64 AVIATION TIRE CHECK GAUGE
